PROFESSIONAL SUMMARY

I am a software developer focused on **TypeScript** and **C#**, passionate about creating practical and efficient solutions. I have experience with frameworks like Next.js, NestJS, and .NET, which have allowed me to build robust web applications and APIs. Additionally, I have knowledge in both SQL and NoSQL databases, ensuring that data is managed efficiently and securely.

EXPERIENCE

Fullstack Developer
April 2023 - Present
Developing personal projects with Next.js, NestJS, TypeScript, and .NET, creating robust websites and APIs. Utilizing Git and GitHub for version control.

Valeo, Technical Electrician
June 2021 - April 2022
As a technical electrician, I learned to solve complex problems logically and precisely. Attention to detail and adherence to technical specifications are skills that I directly apply to software development. Working with various systems and quickly adapting to new technologies reinforced my ability to learn and innovate continuously in programming.

PROJECTS

HotelHopper:

- LucasFonseca0/HotelHopper (github.com)
- Hotel Hopper is a full-stack application that allows users to browse hotels, make reservations, and manage their bookings. The authentication system uses JWT tokens. Developed with NestJS, MongoDB, Next.js, TypeScript, Tailwind CSS, Next UI, Zod.

Inventory management app:

- LucasFonseca0/inventory-management-app (github.com)
- A practical and straightforward solution for inventory management for companies, with intuitive interfaces designed to simplify complex processes for employees with basic technology knowledge. Developed with NestJS, MongoDB, Next.js, TypeScript, Bootstrap CSS, Zod.
